EXPERIENCE

Silicon Craft

Jun. 2026 – Jul. 2026

Digital IC Design Intern | AI Engineer

Bangkok, Thailand

- Fine-tuning an RTL specialist model and creating RFID benchmark workflows to evaluate AI usefulness for hardware-design tasks
- Building and hosting an internal LLM website with RAG, giving company teams a secure way to search internal knowledge and use AI tools

PROJECTS

Lanta LLM Hosting Personal Project, 2026

- Built a Slurm-hosted LLM serving stack with vLLM, SSH tunneling, LiteLLM, FastAPI, Docker Compose, browser chat, health checks, and monitoring, making model serving repeatable on HPC resources

HolySoC RISC-V RV32I System-on-Chip Coursework, 2025

- Designed a Verilog RV32I soft-core SoC on Basys 3 / Artix-7 FPGA with RAM, UART, memory-mapped I/O, testbenches, and C / RISC-V firmware, validating a complete hardware-software path

ExpresSo NB Demand Forecasting Hackathon Super AI Engineer Season 6, 2026

- Built leakage-aware demand forecasting for 1-day, 7-day, and 1-month horizons using time-based validation, data-quality checks, LightGBM, CatBoost, and Slurm workflows, producing reproducible submissions

Hand-Gesture Controlled Robot Arm Embedded Systems Project

- Built an ESP32 robotic arm controlled by glove gestures using ESP-NOW / Wi-Fi, MPU-6050 flex sensors, servo / stepper control, and safety logic, enabling responsive multi-axis motion

EDUCATION

King Mongkut's University of Technology Thonburi

Expected Aug. 2028

Bachelor of Engineering in Computer Engineering

GPA: 4.00/4.00

- **Coursework:** Data Structures and Algorithms, Digital Electronics and Logic Design, Computer Architecture, Database Systems, Linear Algebra

AWARDS & CERTIFICATIONS

Certifications : Huawei HCCDA-AI and HCCDA-Tech Essentials, valid through Apr. 2029

Awards & Leadership : 1st Runner-up, MakeX Robotics Asian Intercontinental 2023; 1st Runner-up, STEM "Mysterious Forest" 2023; Student President, 2022

SKILLS

Languages : C, C++, Python, Java, Verilog, RISC-V Assembly, JavaScript, SQL

Systems : Linux/Ubuntu, SSH, VPN, TCP/IP, WOL, Git/GitHub, Docker, Docker Compose, CPE Server, Slurm, HPC workflows

AI/Data : LLM serving, RAG, vLLM, LiteLLM, FastAPI, fine-tuning, benchmarking, pandas, NumPy, scikit-learn, LightGBM, CatBoost

Hardware : Xilinx Vivado, Artix-7 FPGA, Basys 3, RISC-V ISA, digital logic design, memory-mapped I/O, UART, ESP32, MPU-6050/IMU
